

NORTHERN CALIFORNIA PLANT LIFE: CELEBRATING WHAT WE HAVE WITH AN EYE TO THE FUTURE

Northern California Botanists • 14-15 January 2008 • California State University, Chico • Bell Memorial Union Auditorium

**Northern California Botanists
2008 Symposium
Northern California Plant Life:
Celebrating What We Have With an Eye to the Future
January 14-15, 2008
California State University, Chico campus**

Join us and discover the emerging issues in the field of botany, including new ecological discoveries, mitigation and restoration efforts, vegetation mapping, ethnobotany, and the effects of global climate change on Northern California's plant species.

► **More than 40 experts in the field will host sessions covering:**

- Rare plant monitoring and management
- Wetland restoration and mitigation
- Ethnobotany and vegetation management
- Going underground
- How to be a botanist
- Global climate change
- Vegetation mapping and conservation
- Northern California botanical discoveries

► Network and meet other botanists at the Monday evening reception and the Symposium Banquet featuring Connie Millar, US Forest Service, Pacific Southwest Research Station, our keynote guest.

► Three post conference workshops are also scheduled for Wednesday, January 16, and will focus on the identification and assessment of rare plants and historic land restoration practices.

► Students in the field can apply for an academic stipend to help defray the cost of the Symposium. There will also be a session focusing on career planning for students interested in becoming professional botanists.

► **To register or for more information** please visit the Northern California Botanists Symposium Web site at rce.csuchico.edu/norcalbotany or call CSU, Chico Continuing Education, **530-898-6105**.
