Digital Media for 21st Century Students

Tim Sain, CSU, Chico Educational Opportunity Program (EOP) Advising Intern>>

What I want to do is introduce you guys to some things that have been helpful to me in my education, and hopefully get some feedback from you guys on what you guys use, okay? So if one of these programs that I showed you strikes a chord and you've used something similar or you've used this one, please let us know how you've used it, okay? We will all do a lot better if we share, okay? So my name is Tim Sain. I'm a graduate student here at Chico State. I graduated last year with my BA. I got my Bachelors in Liberal Studies and a Masters, Program for Education, and I used to work for EOP. I worked for EOP for two years, and I love Chico State, man, yes. Any seniors in here? Seniors? Sophomores? The rest are Freshmen? Wow, wow, good, new blood. Okay, so what you're looking at right here, this thing is called bing link [assumed spelling], okay? And it's the first time I've used it in a presentation, but it's meant to make a -- you take any image, you can take an image of yourself, you can take an image that you find off Google, a picture that you take, and you just place it up here, and then you can put interactive links on it here.
You see that? And then this thing can be sent to anyone. So what we're going to do is I'm going to go through each one of these, every single little dot that you see on here is something that we're going to talk about, okay? Don't worry about taking notes or URLs or anything like this, what I'm going to do is I'm going to have the Student Learning Center send you this, okay? So all you've got to do is just click on it, all right?
Digital Media for 21st Century Students
Digital Media for 21st Century Students
So let me show you how -- okay, so this is a book report that was done. The book was called Skeleton Creek, and instead of writing out some long paper about like a novel report, I'm sure you guys have all done novel reports, right? They're boring. This makes it more, a little more interactive.
So what they've done is they've gone and they found a little YouTube clip about the book, and put it right here on the image. So all you've got to do is just click on it.
And then down here is a little -- it takes you to another page. It gives you a little overview on what the book is about. So you see how this media works? Yes?
The way that you use this, and what's great about this thing is, let's see, give me a topic, a subject that you guys are doing or a project that you're doing, somebody in class? You guys aren't doing anything? Lucky dogs.

**Audience Member>>** Sports.
Tim Sain>> Sports? See, you can browse what everyone else has made, too. So not just left up to your own. You can actually open up any one of these and edit them, send them, share them, and it's great. So, see, if you wanted to do something about the playoffs, there'd be a great one for you.
You just click on it, you hover over it, and you see how they put it on here, it's all the games that -- this one is on games.
And if you click on this it'll take you to a page where they've got this information. See how that works? A different way to present.
All right, audacity, have you guys ever heard of audacity? Anyone? Yes? You know what it is? What is it?

**Audience Member>>** [Inaudible]

**Tim Sain>>** Yes, it's a free -- it's kind of like a garage band for Mac. It lets you record and edit voice or music or just about anything that you can put into an audio file. And this comes, this becomes very helpful for HP because HP, used desktops usually don't have any kind of recording devices. But it's a free download, and it's available to you, all you've got to do is just download it to your computer and then it becomes part of the software on your computer, okay?
All right, here’s one of my favorites, Animoto, anyone ever use Animoto? No? This is a video program. It’ll -- each one of these medias that I’m showing you, you can actually upgrade for a little bit of money, but they’re all free, okay? And so with the free version of Animoto you can make 30-minute clips, video clips, and all of the themes and transitions and everything are all right there for you. So let me show you one that I made.
I tried to explore all these things before I showed them to you, but there were a lot of them, so I didn't get to all of them.
So, see, it's just a 30-minute clip, and or a 30-second clip, but it just it has all this background stuff for you, it's all right there. And all I did was just insert my -- all I did was just insert the order that I wanted my videos to go, and there you go. And there's actually some -- there's actually different little song clips that you can put in here, too. [music] But instead of -- and then you can take the code and just embed that into any like PowerPoint or anything like that, like you would for a YouTube video, you know? So instead of going and finding something on YouTube you can actually make your own little video here, okay? I like using these things for my family photos and stuff.
Okay, so PhotoPeach is something very similar. It does the same kind of thing as Animoto,
Okay, so PhotoPeach is something very similar. It does the same kind of thing as Animoto, and so does Stupeflix. What a name, huh? Same kind of thing, you just insert your videos or your pictures and it turns it into a video, like that.
Okay, this one is one of my favorites. So I don’t know about you, but I have like six different social media sites to follow with Facebook and Twitter and anything else -- Flickr. You guys, Instagram, right? Any that I’m missing, that you guys use?

Audience Member>> Pinterest [assumed spelling].

Tim Sain>> Pinterest, very good. Teachers love that one. Any other ones? No? You guys aren’t plugged in, not connected? Or did I mention them all?

say that I wanted to download one, download a -- this is called Symbaloo, and say I wanted to download one –
so what you do is you put in the sites in each one of these. So this person has highlighted all these sites that they use. This is some kind of education, this is some kind of -- it looks like elementary education site,
but what you do is you download one of these backgrounds to the back. And then when you click on this it'll let you put in whatever site that you want, and it downloads the picture for you and everything. And then you just have this right on your desktop. A good way to organize yourself, instead of going, you know, opening up your browser and going to different things or typing in your URLs or going to your favorites, you just put everything right here that you need.
All right, Quizlet, has anyone ever used Quizlet? Yes? What did you use it for?

**Audience Member>>** [Inaudible]

**Tim Sain>>** Yes, you can use them for flashcards. You can use them for -- you can create your own multiple choice quizzes. You can create your own just running notes, study guides, stuff like that. But what's great about Quizlet is that if you can -- if you're being tested on it more than likely someone else has been tested on it, okay? And so they've gone, other people have gone in here from all over the world. This is a worldwide program. And, Fay, any health majors in here? No health majors, no nurses? Nurses, so anatomy, let's say, did you take anatomy yet. No?
The world learns on Quizlet

We make simple tools that let you study anything, for free.

Try it in 60 seconds

Sample study sets created by people like you
Let's say that you want to find out if there's any quizzes on anatomy.
There probably is. So this, some of these are by chapter so they got, you know, some people are doing it, okay, well, I'm going to do chapter one, I'm going to create a quiz, and then chapter two I'm going to create a quiz, and that's textbook specific, but a lot of this stuff is just, is the same. I mean the human body is the human body, right? So some of these things you can download, or not download, sorry, but here you go.
Anatomy and Physiology - chapter 1: planes and sections of the body

- **Sagittal Plane**: Runs vertically through the body, separating it into right and left portions.
- **Median Plane**: Sagittal plane that passes through the midsline of the body, dividing it into equal right and left halves.
- **Transverse (Horizontal) Plane**: Runs parallel to the ground, dividing the body into superior and inferior portions.
So this is a definition. This is a term and definition that someone made, okay? And likely she’s going to have these terms in her class, so she doesn’t have to create it, it’s already made. See that? My wife is a general hygiene major, and she spends hours on this thing, creating, creating, creating, creating. And then you can go back and quiz yourself, also, on these things.
Digital Media for 21st Century Students
Let's see, which one is next here? Popplet,
oh, this is a -- this one is a visual storyboard.
So here it is. So where do I edit here?
I told you I haven’t done this, I haven’t played around with this one very much. Oh, here we go.
So, again, almost all of these digital media, you have access to all this stuff that everyone else has made, too. So this is one that someone else has made, and it's just you could use this to present, you could use this to organize your ideas. What I use stuff like this for, there's another one called Storyboard [assumed spelling] that I use, and I use this to organize my papers, so to outline my papers or to brainstorm, to -- I'm actually working on one right now, coming up with my thesis. And, yes, it's just for visual learners this is great, this is great. And, again, use other people's things. There's no point in recreating the will.

**Audience Member>>** Collaboration.

**Tim Sain>>** Collaboration, very good, that's something that Google Docs is great for, right? And Wikispaces is very similar. The thing about Wikispaces is you're essentially creating a web page, okay, but you're giving access to edit that web page to whoever you send the link to, okay? So let's say that -- what's your name, Bud? Adrian [assumed spelling], let's say me and Adrian are planning a camping trip, right? Well, just two of our friends are going, too, all right? And we've got to find out what we need, right, maybe where we're going, okay? The camping supplies that we need and maybe where we're going. Could you imagine the mess of e-mails that would probably come out of that kind of communication, right, between four people? It would be a stream of -- it would be hard to find, right, it'd be hard to go back. So who is bringing what and where did we say we're not going or we can't go or -- so what this, what Wikispaces does is it allows you to, oh, man, where am I at?

Learn about Wikispaces for Schools, Districts and Universities — Not in Education?
Let's see, oh, here's one,
here's one that --
all right, so this one that is my class, it's for a class right now. And this is -- anyone ever hear of Second Life, Second Life? It's like a virtual world, you create a little avatar, you get to go through and buy things and build things, and some people actually live their lives on this platform. All they do is sleep, wake up and, but anyway, so we have a project to do, an assignment called in Second Life. So she sent us out on these missions in this virtual world, right? So we've created in avatar, and we're going around and doing these things, going and visiting this place, find out what's useful here, blah, blah, blah, blah, right? So, but there's nine of us, there's nine of us in the class, so and we're all working on this one Wikispace. So what she did is she said, go out there and explore, do X, Y and Z, and come back here, and all you guys report on it together, right? Certain things, a couple of the assignments we have to partner with someone and go do.
Second Life Investigation (50 pts). Due by the end of class Monday, December 2, 2013.

We are applying two different skill sets to this assignment. The tasks should be engaging, collaborative, and you will each be able to offer your personal reflections. You are going to visit the different Second Life (SL) sites in groups of two or more. You will document your visits by taking pictures, learning as much about each site as you can, and hopefully talking to the people who run them or spend time there. You will then use your documentation and collected experiences to contribute to our Second Life Class 1996. I have set up six Wikispaces. This is where you will post your information and reflections.

Should you need practice with basic SL skills or a place to meet with your group to begin your SL investigations, meet at our Chico State site. Open Second Life and log in. Then when you click on a slurl, a page in your browser will open. You will be able to teleport to the location in SL then the link in the browser version.

All the links listed below are Slurls. Make sure you have opened SL and logged in FIRST. Then click on the Slurl to get webpage with a teleport link to the site in SL. Also, all the Slurls and the SL assignment have been sent to each of you within SL on a notecard. Look on the upper right of your SL viewer for your mail. Once you accept the notecard, it will be saved in your SL inventory under landmarks (the icon that looks like a suitcase). You can open it and travel around. Close it and it will go back into your inventory for another day, unless you delete it.

1. Visit EdTech Island (Boxers State Units). This is a good place to start.
   EdTech Island

2. Choose two sites from this group to visit. All sites are very educational and well designed.
   - First World War Poetry Digital Archive
   - Faulkner’s Strange Matters: Macbeth
   - NC Holocaust Museum
   - US Holocaust Memorial Museum
   - Machu Picchu
   - Machu, Germany
   - NC wolfpack
   - Split-Land
   - The Alamo
   - The Schaars
   - US Holocaust Memorial Museum
So what we've done is see these places over here are all the places that she's having us visit, right over here, weird names, right?
And so what I can do is just click on one here, and see this is what someone else has done.
And I could put -- I could come over here and edit this, right, and change it around or add my own things.
So when I go and I visit EdTech Isle up here, I'm going to come on here and I'm going to post my stuff. So now this is a class collaborative project, right? There's eight of us, nine of us working on this. And so, I don't know, I find it a lot more useful than Google Docs. I find it a lot more useful than e-mail definitely, right? And the great thing about this you can upload widgets, you can invent codes, videos, files. You can basically create your own website here if you wanted to, lots of people do. And, again, this is absolutely free.
All right, let's see, LiveBinders, anyone ever use LiveBinders? No?
So LiveBinders is just like what it sounds, it's a binder that is stored online.
Who still carries around a flash drive? Yes? Yes, what about -- so if you're not carrying around a flash drive, because you didn't raise your hand, how are you saving your stuff? On your computer? On your computer, just on your computer? No? Yes? Send it to yourself in e-mail? Yes, yes. Store it on an online cloud, like Dropbox or Google Drive? Yes, or iCloud? Yes, yes, well, that's good, good to see that you guys are moving right along. This is another way, okay?
So you create a binder and you basically you just have tabs, you know? But the thing about these binders is it's an electric binder, right? So you can put anything you want in it, you can put videos in it, you can put web pages in it, you can put -- anything, everything that I've showed you so far, the Quizlet or the quizzes, the thing links, the Animoto, all those things can be put inside this binder, okay? All you've got to do is just copy the URL and post it in the binder, and there it is, okay? Sometimes it'll come up the actual video, sometimes it'll just give URL, but...
Same thing with Evernote, anyone ever use Evernote? No?
This one is a little more popular, and it's the same thing. It's an online binder, right? But just about anything you want. The thing about this one, though, is it's accessible from your phone and your iPad, there's an app that you can download from Google Play or the iStore. But, again, it's just a way to organize your stuff and keep it all in one spot.
Almost done here, guys. This one right here actually I just found, and I love it.
We'll just look at another one.
Okay, so this is a presentation software, or not a software, it's an online media. You don't download it to your desktop or anything, it's all stored online, but so I'm curious to how you guys do a presentation. Let's say you guys tried -- probably some of you guys are working on some right now, right? I've got three I'm working on. So I've showed you a couple ways. I showed you a way to do it with Thing Link [assumed spelling], that's the way that I'm showing you with interactive image. There's PowerPoint, of course, right? What other ones do you guys use? Prezi, an awesome one. I'm actually going to give you -- I'm actually a trainer for Prezi. I'm going to give you guys a whole bunch of information on how to use Prezi effectively. And anyone else? No? Well, here's another one. This one is called PowToon, and a weird name, but all this stuff -- yes, so this is someone created.

Audience Member>> [Inaudible]

Tim Sain>> I'm not promoting ComfortNet, okay?

Audience Member>> [Inaudible]

Tim Sain>> I'm just telling you they created this using PowToon.
You don’t have to have video in the background, I mean music, you don’t have to have music in the background. I don’t know why this isn’t logging in here.

ABOUT:
Strange things are happening in Skeleton Creek and Ryan and Sarah are trying to get to the heart of it. But after an eerie accident leaves Ryan housebound and forbidden to see Sarah, their investigation takes two tracks: Ryan records everything in his journal, while Sarah uses her videocam to search things out... and then emails the clips for Ryan to see.

In a new, groundbreaking format, the story is broken into two parts – Ryan’s text in the book, and Sarah’s videos on a special website, with links and passwords given throughout the book.

Facebook Join the community here Media Kit
Okay, so there's also something else I want to show you, it's called Merlot. Is anyone familiar with Merlot? No? Okay, so what happened is a bunch of these big education gurus got together and they decided they were going to create a place for universities, right, to store a bunch of useful information for students, right, or for education or for research or for teaching, for instruction, that kind of stuff, okay? And what happened is they run out of funding, they ran out of funding, okay? So they said we have this huge website with all this awesome resources, right? And it's kind of like the Merium Library website or the databases, kind of like that, right? But you can store all these programs, like I've showed you, right? Well, what happened is that all these, these gurus ran out of money, right? They were grant funded and they ran out of money, so they decided that they were going to give it away to someone to manage. And what they did is they gave it to the California State University system. And so now it has been completely transformed. They've given it a new name, and it's basically just a collection of great stuff that's been peer reviewed, right? So it's been reviewed. There's people that's gone through this and said, look, this is good, this is why it's good. This sucks and this is why it sucks. And, yes, and it's got three star ratings and all kinds of stuff. Let's see, is this it?
Yes, all right, so give me another one? Who said sports? Something else you guys are working on, somebody? Sure, anything?

**Audience Member**>> Rape kits.
So here's a rape investigation, right here. This study tracks 15 rape survivors for a month, so that's not exactly what you're looking for, but it might be something worth looking at, right?
Here is an online teaching module, right?
And so, see, you can go over here, it's been reviewed. The things that have been reviewed the most come towards the top of your search, okay? So they're saying these are the most useful, these are the things that are most used, more people have looked at these, given them positive responses, that kind of stuff. So it's gotten four-and-a-half ratings here by its peers, right? And the users, so if you went on here and viewed this you could come back and also view it. You create your own online collections, so if you want to create a folder you just plug these into the folder.
And what this does, so this one is an online module, okay? So you go through each one of these and it's a lesson, right? And then you have a little test at the end.
Conferencing tools for international education online

The Case Library provides abstracts of nine currently available cases which span the globe from Bosnia and Rwanda to Burma and India.

1. A Just War? President Clinton’s Response to Kosovo

Chico State is actually pretty proud of this site.
Found it, okay, this one is really cute. My third graders would love this, little bird tails.
