Summer Session is a great opportunity to get the classes you need.

Take a course on campus, or access a class online at home this summer.

Successful Study Tips for Summer Session 2013

The Summer Session schedule contains accelerated sessions (three, four, and six-week sessions). Despite the short term, the workload is the same as a 16-week session. In addition to 45 hours of course time, you should expect readings and assignments.

Some helpful tips:

- Contact your advisor about which courses you need and if Summer Session is the right choice for you. Only one course per accelerated session is recommended.

- Look at your course information in Blackboard after the last week in May. The syllabus should list textbook and the course material information.

- Acquire the textbook and/or course materials prior to the course.

- Start on assigned reading before the course starts.

- Review the syllabus, and mark up a calendar to schedule your course work. Don't get behind.

- Contact your faculty member if you are having any problems or difficulty.

- Please read the add/drop and refund policies on the Summer Session website: rce.csuchico.edu/summer.
