About Soul’s Journey
Wednesdays, Sep 09–Oct 7 • 10 AM–11 AM

The concept of reincarnation is accepted as reality by many in the East and West. The varied and many successive lifetimes are commonly viewed as an endlessly repeating wheel. In this course we will look at the journey of “jiv-atma” (embodied soul) or the Divine Theme, of which reincarnation is only a part. In this class we will explore the Divine Theme, focusing on the mechanics that drive the soul from taking form in the first place. The material is based mostly on Meher Baba’s major work "God Speaks," his philosophical treatise on the biography of the soul.

Peer Leader(s): Deborah Muth: b_babahapy@hotmail.com, (530) 304-2385
Location: Craig Hall: Gordon 2
Special Note(s): Class will not meet on 9/23.
Bio(s): Deborah Muth - Deborah grew up in a fairly normal, middle class home in the 60’s. She has a deep appreciation of philosophy/metaphysics and a curiosity about the workings of things. She has experience as a substitute teacher in the elementary grades of a private school in North Carolina. She holds a national diplomate in Chinese medicine and herbology. A pilgrimage to Meher Baba’s tomb shrine and pilgrim center near Ahmednagar, India in 1986 changed her life. Love left its impression personally and indelibly. Deborah is 61 years old and lives in Chico with her husband Gary and two cats.

Acrylic Painting
Tuesdays, Sep 08–Sep 29 • 9:30 AM–11:30 AM

A hands-on class using acrylic paint and mixed medias that introduces the beginner painter (and refreshes the seasoned artist) to the medium. We will look at composition, color choices, color mixing and technique in relation to choice of subject. There is a $45 supply fee for this class.

Adapting to Drought in the North State: Reality and Reaction
Wednesdays, Oct 21–Nov 18 • 1:30 PM–3 PM

Change has been the moving force on our planet for millions of years and has always been a constant. However, in the human perspective of time, the effects of the current drought has changed our lives way too quickly. How we are responding to a new water-scarce world will be the topic of this class. We will hear presentations from experts in our region who have been working to find ways to adapt to current and future drought situations. Instead of “doom and gloom” they will give you a different perspective—one of responsible, and hopefully sustainable, adaptation. These stories of current water-wise efforts in the North State in agriculture, ranching and wildlife management will explain how we can still live optimally on our land. Optional field trips will be arranged to relevant sites following the presentations.

Even the most adoring cat owner may not understand the complexities of the feline, the importance of the carnivore connection and how cats think. We will trace the evolution of the domestic cat from solitary hunter to occupant of our bedrooms. Cats remain independent, predatory, and wary of social contact yet bond with us in powerful relationships. This course will illuminate their ancient quirks and how they inform our daily lives with them.
