The History, Archaeology & Culture of Greece

Travel Dates: June 4–30*

This study abroad program offers the opportunity to study the history, culture, and archaeology of Greece from a diachronic perspective. The program will introduce students to Greece’s complex past through site visits, reading assignments, lectures, and exposure to Greek culture.

During this program, we will explore this complex dynamic diachronically through the application of different types of evidence (literary, documentary, material) to grounded historical questions. In so doing, students will gain direct exposure to a wide range of issues and problems that historians, art historians, archaeologists, anthropologists, political scientists, and others continue to grapple with today.

We will visit the Acropolis, the National Archaeological Museum, and other major cultural institutions. Spend a week off the beaten path in Ancient Corinth, one of antiquity’s most important cities and the focus of major ongoing archaeological exploration today. We’ll take a couple of day trips into the Corinthia as well. Encounter Venetian Greece in lovely Nafplio and pre-historic Greece in the surrounding Argolid. We’ll take day trips to Byzantine churches as well.
